1. Company Profile & Operational Background

Porbido Trucking & Hauling Service is an independent logistics contractor operating out of Urdaneta City, Pangasinan. The business serves as a key contracted transport provider for **Cargill Philippines, Inc.**, hauling raw agricultural commodities (corn, feed ingredients, and bulk goods) between major manufacturing plants, ports, and regional warehouses.

- Fleet Assets:** Total fleet of 8 trucks, with 4 heavy-duty 10-wheelers currently in active daily rotation (e.g., Plate Nos. CCK 5273, NAK 2202, CAK 2693, CAO 3510).
- Key Routes & Service Scope:** Short-haul routes (e.g., Subic → Pulilan, Subic → Rafian/Baliuag) and long-distance inter-island ferry crossings (e.g., Pulilan → Iloilo, Pulilan → Cebu, Manila Port → Misamis/Cagayan De Oro).
- Operational Staffing:** The administrative and data encoding workload is handled by only **two personnel** (the Owner and one on-call administrative staff).

2. Identified Operational Bottlenecks & Failure Points

Operating across multiple routes with only two admin staff managing paper receipts and Messenger group chats has created a high-risk operational bottleneck. The manual pipeline suffers from **4 critical failure points**:

FAILURE POINT	CURRENT MANUAL VULNERABILITY	OPERATIONAL IMPACT
1. Weight & Rate Encoding Typos	Staff manually copy weight tonnage from physical paper tickets into Excel cells.	DIRECT FINANCIAL LOSS Underbilling freight on Cargill billing submissions.
2. Swapped Route Destinations	Origin and destination locations are typed as unvalidated plain text.	PAYMENT DELAYS Rejection of invoices during Cargill's monthly audit cycle.
3. Unbilled / Lost Trips	Dispatch assignments and Delivery Receipts (PODs) are posted in noisy Messenger group chats.	UNCOLLECTED REVENUE Completed trips get buried in chat history and missed during invoicing.
4. Cash on Hand (COH) Black Hole	Driver trip cash advances, fuel receipts, and salary deductions are kept on paper notes.	PAYROLL DISCREPANCIES Inaccurate overage/shortage carry-over and driver settlements.

3. Concrete Audit Findings (Evidence from Billing Records)

A direct comparative audit between **Porbido's Internal Driver Billing Ledgers** (CCKBILLING2026 . pdf) and **Cargill's Official Billing Summaries** (29-50 (1) . pdf) proves that manual spreadsheets are actively costing Porbido money.

Audit A: Weight Transcription Shortfalls (Sample: Truck CCK 5273)

TRIP / DATE	TLO #	PORBIDO RECORDED	CARGILL OFFICIAL	WEIGHT TYPO	REVENUE IMPACT
Trip 111 (Jan 21)	849742	31.68 tons	31.75 tons	-0.07 tons	Underbilled P56.42
Trip 112 (Jan 24)	70118	33.10 tons	33.11 tons	-0.01 tons	Underbilled P4.34
Trip 113 (Jan 26)	70120	32.02 tons	32.13 tons	-0.11 tons	Underbilled P91.14

Audit Insight

In just 3 sample trips, manual transcription typos resulted in **P151.90 of uncollected revenue**. Multiplied across 8 trucks running dozens of trips monthly, these small typos accumulate into tens of thousands of pesos in lost revenue annually.

Audit B: Route Mislabeling & Broken Spreadsheet Formulas

- **Destination Mismatch:** On Trip 116 (Jan 30), Porbido recorded the route as Iloilo → Pulilan with TLO 4959. Cargill's official summary (Summary 34 B) logged this haul as Cargill ILOILO → Manila Port. Such mismatches cause immediate reconciliation delays.
- **Broken Spreadsheet Formulas (#REF! Errors):** In CCKBILLING2026 . pdf (Pages 3 and 6), Excel cell formulas corrupted into Less: Total Expenses #REF! and Income #REF!, leaving management with **zero visibility into actual net profit** for those billing cycles.

4. Proposed System Solutions & Business Results Matrix

IDENTIFIED PROBLEM	SYSTEM SOLUTION FEATURE	EXPECTED BUSINESS RESULT
Manual Weight & Route Entry	Dropdown Route Selectors & Strict TLO/Weight Numeric Input Validation.	100% TYPO ELIMINATION Zero route or tonnage billing discrepancies.
Lost / Buried Messenger Receipts	Mobile Camera Upload Queue for Drivers with Admin "Approval" Checkpoint.	STREAMLINED VERIFICATION Instant image matching without chat searching.
Unbilled Trip Dispatches	Visual TLO Lifecycle Board with "Unbilled Trip" overdue warnings.	100% REVENUE RECOVERY Zero completed trips left un-invoiced.
Unclear Driver Advances / Overages	Automated Rolling Driver Cash-on-Hand (COH) Settlement Ledger.	TRANSPARENT PAYROLL Automatic carry-over of driver overages & shortages.
Manual Excel Summaries	Database Auto-Math Engine & 1-Click Cargill PDF Statement Generator.	90% TIME SAVED Fast 30-day billing collection cycles.

5. Conclusion & Technical Recommendation

Summary Recommendation

Porbido Trucking & Hauling Service does not need more administrative staff; it needs a **lightweight, error-proof Transportation Management System (TMS)**. By enforcing validation rules at entry, centralizing receipt capture, and automating freight calculations, Porbido can protect its profit margins, streamline its 2-person admin team, and ensure smooth reconciliation with Cargill Philippines.
